Taking the DEC Exam

In New York, UST Class A/B Operators can only be certified after taking and passing a DEC-administered exam. This exam is open book and can be taken in person with the DEC or online at your convenience.

Step One: Take the PASS Exam Preparatory Course

Step Two: Make Your Account and Begin the Exam

Make an account at this link, then confirm your email address. When you get to the user dashboard, there will be a tab to the upper right that says “Study Material” This is where you can find the resources the DEC provides you, if you choose to use them.

To start the exam, you will click on one of the blue buttons underneath “exam” box and follow the instructions they provide.

If you have any questions, you can refer to this extensive exam tutorial provided by the New York Department of Environmental Conservation. You can retake the exam more than once, but after three failed attempts you will not be able to try again for six months, so take your time!

If you have any questions, please email the training department at the DEC or our support team.

Good luck on your exam!
