Minnesota MPCA Class A/B Exam Preparation

The Minnesota Pollution Control Agency (MPCA) requires Class A and Class B operators to pass an online examination to obtain certification. PASS Training & Compliance's Class A/B Operator Training (MPCA Exam Preparation) course is approved to help operators prepare for this exam. Completion of the PASS course does not grant MPCA certification.

Certification Process:
1. Register for the MPCA Class A/B exam through the MPCA website.
2. After registering, you have ten (10) days to complete the exam and may start and stop as needed.
3. If the exam is not passed or completed within the timeframe, an MPCA-approved training course, such as PASS, is required.
4. After completing training, contact Jenalee Quigley at MPCA to request an exam reset (jenalee.quigley@state.mn.us | 651-757-2238 | 1-800-657-3864).
5. Once passed, the MPCA will email your operator certificate.

About PASS Training & Compliance:
PASS UST operator training meets or exceeds all federal requirements and is delivered through our proprietary Learning Management System (LMS). Courses are available 24/7 on any internet-connected device and may be completed in one session or in segments with no time limits.

Training content is divided into chapters using text, images, and narration. Each chapter includes a quiz with reflexive feedback to reinforce learning. The course includes a final exam; a score of 80% or higher is required to receive a certificate of completion. Average completion time is approximately four (4) hours plus exam time.
